The following is an examiner's statement of reasons for allowance: Blik (US 2465787, figures 1-3) and Casey (US 4003227, figures 1 and 4-7) are the closest art of record. While each teaches a device inherently capable of securing trousers about a wearer's waist, each fails to teach in combination (1) that the base plate includes the structure of claim 6, lines 2-6, as reproduced below:

a pair of inner channels extending from one of the side edges of the base plate to the other of said side edges, each channel including a geared surface therein;

a pair of outer channels extending from one of the side edges of the base plate to the other of said side edges, each channel including a geared surface therein;

Nor is there any suggestion in the art of record to (2) modify the one clasp of either patent so that a first clasp has the structure set forth in claim 6, lines 8-10, as reproduced below:

said first clasp including a pair of arms each having teeth disposed thereon, each of said arms of said first clasp received within one of the inner channels with said teeth inter-engaging the geared surface within said inner channel;

And there is no suggestion in the art of record to (3) modify the other clasp of either patent so that the second clasp has the structure as claimed and the functioning details for both clasps as set forth in claim 6, lines 12-19, as reproduced below:

said second clasp including a pair of arms each having teeth disposed thereon, each of said arms of said second clasp received within one of the outer channels with said teeth of said second clasp inter-engaging the geared surface within said outer channel thereby locking said arms of said first clasp within said inner channel and said arms of said second clasp within said outer channels ~~within said channels~~, whereby compression of each of said arms disengages the teeth of said first clasp and said second clasp from the geared surfaces within said inner channel and said outer channel respectively ~~channels~~ allowing each of said arms to move freely therein.
